Fiscal Note Version – New

Description

House File 2413 requires school districts to prioritize the allocation of available funding for the purposes of extending the school calendar or the instructional hours in a school day.

Assumptions

No additional funding is provided in this Bill. Additionally, the Bill specifies that an increase in instructional time is a primary goal for school districts and does not specifically mandate the change. The action taken by each school district in response to this Bill is not known at this time.

Funding sources that may be used to implement the goal would include all federal, State, and local funds that have been designated for use for instructional and support services. Funding designated for non-instructional purposes such as revenues from the Secure an Advanced Vision for Education (SAVE) fund, the Physical Plant and Equipment Levy (PPEL), and Debt Services Levy cannot be used to expand instructional time.

Fiscal Impact

No State General Fund impact is anticipated.

In meeting the specified goal, school districts may increase local revenue sources and this may include any remaining local instructional support revenue capacity available to the school district. However, the action taken by the school district and the fiscal impact is currently unknown.
